

Docker CLI Installation

The screenshot shows the Docker Desktop application window. The left sidebar contains navigation options: Containers, Images, Volumes, Dev Environments (with a BETA badge), Extensions (with a BETA badge), and Add Extensions. The main panel is titled 'Images on disk' and shows a summary: 'Last refresh: less than a minute ago', '3 Images', '450.78 MB total size', and '309.11 MB / 450.78 MB in use'. Below this, there's a section for 'Images' with a 'Give Feedback' link. The 'LOCAL' tab is active, showing a table of installed images. The table has columns for NAME, TAG, IMAGE ID, CREATED, and SIZE. Three images are listed: centos, nginx, and ubuntu. The 'centos' and 'ubuntu' images have a green 'IN USE' badge. At the bottom, there's a section for 'Connect to Remote Content' with three options: 'Store and backup your images remotely', 'Unlock vulnerability scanning for greater security', and 'Collaborate with your team'. A 'Sign in' button is visible. The Windows taskbar at the bottom shows the system clock as 8:44 PM on 10/13/2022.
